Article Information

Comparison of Global Computing with Grid Computing

Babak Behsaz; Pooya Jaferian; Mohammad Reza Meybodi

Summary: In recent years, global and grid computing emerge as two powerful technology we compare these two approaches of distributed computing. First, we present a definition that accentuates the key point in this trend. This key point distinguishes global computing covers many such systems. Second, we contrast two approaches in general characteristic them in technical issues, we show that the key point in our definition of global computing is many technical differences between these methods. Finally, we present our opinion about global and grid computing
